

Excavator Direct Mail Program

Purpose

The purpose of this program is to provide general pipeline safety information to commercial excavators. The message will include the basic “Dig Safely” message, information about the use of one-call centers, how to recognize and respond to pipeline emergencies, and how to obtain additional information from the Association and its supporting members.

Scope

The program is directed toward companies and governmental agencies involved in excavation on a countywide level. It may be expanded to a statewide level, depending on member participation. Excavators are identified through several sources: commercial data providers (MCH Strategic Data, Info USA, and Acxiom), web site registrations, industry listings, member lists, and other sources. See the *Stakeholder Identification* section below for additional detailed information.

In California, Excavators will be identified from the listing of all licensed contractors provided by the Contractors State License Board (CSLB) and from the commercial data sources. The CSLB list will be used to identify licensed contractors and the commercial data sources will be used for non-licensed entities. See the *Stakeholder Identification* section below for the listing of license codes and class descriptions to be included.

In Nevada and Arizona, the Licensed Contractors lists will be used to supplement the commercial list sources. See the *Stakeholder Identification* section below for the listing of license codes and class descriptions to be included.

Program Elements

The elements include a direct mailing of the *Excavation Safety Guide - Pipeline Edition* and additional information available on the web site. The mailing is scheduled to be sent early in April. Follow up educational meetings will be coordinated on a local level with the one call organizations. In addition to the mailing, all state one call organizations will be shipped a sample quantity of the guides and additional copies will be made available to them upon request, free of charge.

Message Content

Messages will be consistent with the CGA damage prevention best practices and shall include the required messages contained in 49CFR192.616, 49CFR195.440 and API RP-1162. These messages are listed below with the section in the magazine where they are located shown in parenthesis.

Program Evaluations

An evaluation of program effectiveness will be performed at least once every four years. Previous evaluations were performed in 2007, 2010 and 2014. A detailed evaluation addressing outreach was performed in 2014. The next scheduled overall evaluation will be performed in 2018.

Documentation

All program documentation will be available from the website, including: identity of participating members, excavator lists, mail piece, and survey results.

Follow-up Communications

Stakeholders are encouraged to contact the Association via email for additional information. They typically request additional materials, change mailing list information or request other resources. The Association responds directly to all incoming e-mails requesting additional information and also forwards specific requests to local members. E-mails are archived in the program documentation folder entitled “Follow-Up Communications”.

Sign up

Companies may sign up by completing and submitting a Member Application form. Current members may sign up by sending an email to pipeline.association@pipelineawareness.info. State One-Call organizations may participate as sustaining members.

Dues

The cost per piece for the program is \$1.10. Program dues are determined by dividing the number of participating member/counties into the total projected cost for a state. Each state will have a different member/county (MC) rate depending upon participation levels and total number of excavators. Final member/county fees will be established in February when final member participation levels are known. The dues for extending the program to additional counties are based on the number of excavators in that county. To determine the program cost for any county, multiply the number of excavators in that county by \$1.10. Program dues for the state of

Excavator Direct Mail Program

California are determined by the number of excavators associated with each member company. Additional information about this process is available upon request.

Program History

- 2006 – Initial mailing of the magazine to excavators in 8 states. The pipeline safety messages were included on the inside front and back cover in English and Spanish and also in the pullout safety poster.
- 2007 – 440,000 copies mailed to excavators with 11 of the states involving full statewide coverage. The CGA Excavation Best Practices and the Federal Laws covering excavation safety were included.
- 2008 – 450,000 copies mailed to excavators with 12 of the states involving full statewide coverage. A member directory was included listing emergency and non-emergency contact information.
- 2009 – 550,000 copies mailed to excavators with 16 of the states involving full statewide coverage. A specific article about pipelines and an article about PIPA were also included in this edition.
- 2010 – 575,000 copies mailed to excavators with 17 of the states involving full statewide coverage. A specific article about pipelines and the evacuation chart for natural gas pipelines were included in this edition.
- 2011 – 535,000 copies mailed to excavators with 17 of the states involving full statewide coverage. A specific article about pipelines and a quick reference chart identifying the indications of a pipeline leak, hazards of a release, and appropriate emergency response actions by product transported was included.
- 2012 – 776,000 copies mailed to excavators across 50 states with 17 states (AL, AZ, CA, CO, CT, ID, LA, MN, MS, MT, ND, NM, NV, SD, UT, WI, and WY) involving full statewide coverage. Two sources, Info USA and USA Data, were used to develop the mailing list. Eight pages were added and a new section titled “What’s Happening in Your State” was incorporated into the guide and the new Pipeline Safety video was featured on the back cover.
- 2013 – 452,000 copies mailed to excavators across 35 states with 12 states (CA, CO, ID, MN, MT, ND, NV, SD, UT, WA, WI, and WY) involving full statewide coverage. Two sources, Info USA and USA Data, were used to develop the mailing list. The new section titled “What’s Happening in Your State” was continued and the Pipeline Safety video was featured on the back cover. The video was also advertised in the quarterly issues of the Damage Prevention Professional magazine. A survey of 200 excavators was conducted to obtain information about the value of the messages and important sections.
- 2014 – 454,000 copies mailed to excavators across 36 states with 12 states (CA, CO, ID, MN, MT, ND, NV, SD, UT, WA, WI, and WY) involving full statewide coverage. Two sources, Info USA and USA Data, were used to develop the mailing list. A review of the SIC codes used for stakeholder identification was completed and an expanded list of six digit SIC

Excavator Direct Mail Program

codes was developed. A message map for the required messages was created and incorporated into the program outline. An outreach evaluation comparing the purchased lists with the California Licensed Contractors list was performed. The California Licensed Contractors list was found to be more complete than the purchased lists and will be used in future years. A new 12-minute video for excavators entitled "Pipelines" was created with Underground Focus.

2015 – 522,000 copies mailed to excavators across 36 states with 12 states (CA, CO, HI, ID, MT, ND, NV, SD, UT, WA, WI, and WY) involving full statewide coverage. Two sources, Info USA and Acxiom (USA Data), were used to develop the mailing list in all states except California. In California, the California Licensed Contractors list was used along with commercial lists for the non-licensed entities. An outreach evaluation comparing the purchased lists with the Nevada Licensed Contractors list was performed. The Nevada Licensed Contractors list was found to contain additional records not included in the commercial lists and will be incorporated in 2016. A review of the SIC codes used for stakeholder identification was performed again in 2015. It was determined that the general four digit codes ending in "00" are not needed and only the more specific six digit SIC codes will be used in the future.

2016 – 468,000 copies mailed to excavators across 36 states with 12 states (CA, CO, HI, ID, MT, ND, NV, SD, UT, WA, WI, and WY) involving full statewide coverage. Two sources, Info USA and Acxiom, were used to develop the mailing list in all states except California. In California, the California Licensed Contractors list was used along with commercial lists for the non-licensed entities. The Nevada Licensed Contractors list was also incorporated into the mailing list for the first time in 2016. An analysis of the records where more than one mail piece was sent to the same address was performed. It was determined that 2.5% of the overall list were duplicate records (the same company with just with a slightly different spelling of the company name in each record). The percentage was significantly higher in Nevada (10%) where the state licensing list was used along with the two commercial sources. Additional methods for identifying and eliminating duplicate records should be explored for future mailings.

Stakeholder Identification

Local Governmental Agencies – All States and Counties

Governmental agencies involved in excavation are identified using the job function titles listed below. MCH Strategic Data is the list source for these stakeholders.

Public Works Director
Roads and Bridges Director
Street Superintendent

Transportation Director
Utilities Director
Water Director
