Purpose

The purpose of the program is to provide general pipeline safety information to Public Officials. The message will include: awareness of hazards associated with pipeline facilities, what types of emergencies may occur on pipeline facilities, how to obtain information about the location of pipeline facilities, general one call requirements, and how to contact pipeline companies for additional information.

Scope

The program is directed toward local, city, county or state officials and/or their staffs having land use and street/road jurisdiction in areas where pipelines are located. Local School Districts are also included in the program outreach. Examples are:

- Planning boards
- Zoning boards
- Licensing departments
- Permitting departments
- Building code enforcement departments
- City and county managers
- Public and government officials
- Public utility boards
- Includes local Governing Councils as defined by many communities
- Public officials who manage franchise or License agreements
- School Districts

Officials are obtained from commercially available data sources (InfoUSA and MCH) using job titles or SIC codes. Communications are directed toward the person, appropriate job titles or the Senior Official at the agencies. See the Stakeholder Identification section for additional details.

Program Elements

The elements in the program will be a mailing of the Pipeline Awareness newsletter with a custom cover letter listing member companies by state or county. The packet will also include an Information Request form and a postage paid return envelope. Paper forms received by the Association will be processed and the data entered in the online form. The mailing is scheduled to be sent out in the month of August.

Message Content

Messages shall include the required messages contained in 49CFR192.616, 49CFR195.440 and API RP-1162. These messages are listed below with the section in the Newsletter where they are located shown in parenthesis.

- Pipeline purpose and reliability
  
  *(Letter from the Executive Director – page 2)*

- General location and purpose of gathering pipelines
  
  *(Types of Pipelines - page 4)*
Pipeline Association for Public Awareness

Public Officials Newsletter

- Pipeline location information and availability of NPMS
  *(Pipeline Maps - page 1)*
- One-Call requirements
  *(Gold Shovel Standard and State One Call Laws – pages 8 and 9)*
- Awareness of hazards and prevention measures undertaken
  *(Know the Hazards – center section
  Building & Maintaining Safe Pipelines - page 10)*
- Physical indications of a pipeline release
  *(Know the Hazards – center section)*
- Steps to take to protect the public in the event of a pipeline release
  *(Know the Hazards – center section)*
- Procedures for reporting a pipeline emergency
  *(Know the Hazards – center section)*
- Emergency preparedness communications
  *(Emergency Preparedness - page 5)*
- How to obtain an overview of an operator’s Integrity Management Program
  *(If you want more information about – back cover)*
- Copies of materials provided to affected public and emergency officials
  *(If you want more information about – back cover)*
- Company contacts
  *(If you want more information about – back cover, and cover letter)*
- How to get additional information
  *(If you want more information about – back cover)*

**Program Evaluations**

An evaluation of program effectiveness will be performed every four years. Evaluations were performed in 2007, 2010, 2014 and 2018. The next evaluation will be performed in 2022. The last outreach evaluation was completed in 2017.

**Documentation**

All program documentation will be available from the website, including: identity of participating members, lists of Public Officials, mail pieces, and any survey results or feedback. A summary report of the information requests will also be posted in the follow up folder.

**Follow-up Communications**

Stakeholders are encouraged to send in requests for information with the paper form in the return envelope or in the online "Information Request" form on the web site. They can also send an email directly to the Association at: pipeline.association@pipelineawareness.info The organization will respond to all incoming emails and may forward specific requests to local members. Follow up communications from the Association are archived in a program documentation folder entitled “Public Officials Follow-Up”. Members are expected to retain records of their own follow up communications. The Association does not retain copies of member communications.
Dues

The base member dues for the program are $125 per member/county. This fee will be reduced in states where participation levels are sufficient to create cost sharing. The final dues for each state will be established at the end of January when all participation levels are known. Members can expect to receive invoices in February or March.

Sign up

Companies may sign up by sending an email to pipeline.association@pipelineawareness.info indicating the states and counties they wish to participate in. The deadline for signing up to participate in the program is January 15.

Program History

2006 – Initial mailing of four-page newsletter to over 10,000 officials with an article about the various types of pipelines and their purposes featured on the cover front.

2007 – Mailing of four-page newsletter to over 47,000 officials featuring an article about locating pipelines near you on the front cover.

2008 – Mailing of six-page newsletter to over 50,000 officials featuring articles about construction of new pipeline infrastructure and the actions pipeline operators take to promote safety on the front cover.

2009 – Mailing of six-page newsletter to over 53,000 officials featuring an article about school pipeline safety on the front cover.

2010 – Mailing of eight-page newsletter to over 64,000 officials featuring an article about 911 dispatchers on the front cover.

2011 – Mailing of eight-page newsletter to over 69,000 officials featuring an article about PIPA on the front cover.

2012 – Mailing of eight-page newsletter to over 69,000 officials featuring an article about why it is important to know about the pipelines in their area. The newsletter was poly-bagged with a cover letter that included the names of operators in their county or state, the facilities operated, emergency and non-emergency phone numbers.

2013 – Mailing of twelve-page newsletter to over 55,000 officials in 37 states featuring an article about emergency preparedness and pipelines. The newsletter was poly-bagged with a cover letter that included the names of operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. An evaluation of the outreach was performed in a sample county and the member list from the American Planners Association was incorporated into the mailing of the Pipeline Awareness newsletter as an additional list source.

2014 – Mailing of twelve-page newsletter to over 56,000 officials in 36 states featuring an article about pipeline safety and security. The newsletter was poly-bagged with a cover letter that included the names of operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. The member list from the American Planners Association was used as an additional list source. A message map for the required messages was created and incorporated into the program outline.

2015 – Mailing of twelve-page newsletter to over 67,000 officials in 36 states featuring an article about school pipeline safety. The newsletter was poly-bagged with a cover letter that included the names of operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. School district offices located in a program county were included in the mailing. Data from the National Center for Education Statistics (NCES) was used as the list source for school districts. Using job function titles with data acquired from MCH Strategic Data was compared to using SIC codes / keyword filtering with data from InfoUSA. It was determined that the use of job function titles with the data from MCH will provide a more accurate list for local and county level officials.
Public Officials Newsletter

2016 – Mailing of twelve-page newsletter to over 55,000 officials in 36 states. The cover of the newsletter did not include a feature article. It was redesigned to include the table of contents and highlighted information about the contents of the newsletter. The newsletter was poly-bagged with a cover letter that included the names of operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. This was the first year MCH data was used for the list of local level officials and school districts.

2017 – Mailing of twelve-page newsletter to over 63,000 officials in 40 states. The newsletter was re-designed to have a different look and feel. The standard content was further refined, and additional personalized articles were included. The newsletter was poly-bagged with a cover letter that included the names of member operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. The US Census Bureau data was used to identify missing Townships and Special Districts. These records will be researched for inclusion in the future.

2018 – Mailing of twelve-page newsletter to over 49,000 officials in 37 states. The design of the newsletter followed the new layout that was created in 2017. The newsletter was poly-bagged with a cover letter that included the names of member operators in their county or state, the facilities operated, emergency and non-emergency phone numbers. The packet also included a paper “Information Request” form along with a postage paid return envelope. A 2-hour webinar covering NPMS and PIMMA was held on September 18, 2018. This webinar was conducted by Amy Nelson with PHMSA. A second webinar is planned for February 7, 2019. The US Census Bureau data was used to identify missing Townships and Special Districts. These records will also be researched for future mailings.
