COLORADO

SB 167 Signed 5/25/2018– Colorado underwent substantial changes with Senate Bill 167. First, the establishment of the Underground Damage Prevention Safety Commission within the Department of Labor and Employment. This commission is tasked with (a) advisory capabilities in association with best practices and training to prevent damage to underground utilities, policies that enhance public safety which include the establishment and periodic updating to industry best standards, and policies and best practices associated with the Colorado 811 program, (b) review complaints of alleged violations and order remedial action of penalties, (c) review association submitted annual report of specific one call locate and notice requests. Also, the incorporation of special provisional oversight restrictions for home rule county, city, municipality or power authorities. This commission will consist of governor appointments from the following groups: Colorado Counties, Inc., Colorado Municipal League, Special District Association, Colorado Energy Industry, Colorado Contractors Association, excavator association members (2), American Council of Engineering Companies, Investor-Owned Utilities, Rural Electric Association, Pipeline Association, Telecommunications and Broadband, Water Utility Council, Department of Transportation, and Commissioner of Agriculture. Further, structure, procedures and penalty structures are established. The penalty structure takes into account severity of violation and amount of previous violations in the last twelve month to make up a progressive monetary guideline.

Other notable changes are establishment and procedures for the safety commission fund and the damage prevention fund, exemptions from the definition of excavation, definitions for the following: ASCE38, licensed professional engineer, and subsurface utility engineered required project. Still further additions are: design requirements, excavator guidance for the purpose of exposing facilities, procedure for marking standards, life of ticket in annual road maintenance for 180 days with restrictions, and procedures for obtaining positive response from facility owners.

Beginning January 1, 2019, only when the ticket is created, a secondary excavator may be added to the ticket for activities that involve excavation for utility location. Also, mandatory positive response is required.

More changes will be in effect as of January 1, 2021 in terms of one call requirements to the association and the mandate to provide information to the notification association of all locations of any underground facilities that the member owns or operates. It is highly recommended to reach out to the Colorado 811 center to get a comprehensive list of all changes and effective date. Link below.

http://colorado811.org/

CALIFORNIA

Important dates from 2017 Legislation:

January 1, 2018, every operator may supply an electronic positive response through the regional notification center before the legal excavation start date and time. The regional notification center shall make those responses available to the excavator

July 1, 2018: The Regional One Call Center board shall investigate possible violations.

July 1, 2020, The California Underground Facilities Safe Excavation Board shall enforce the provisions with limited exemptions. The board shall not initiate an enforcement action pursuant to this subdivision for a violation that occurred prior to July 1, 2020

Assembly Bill 1914 Approved 9/23/2018
Effective changes as of July 1, 2020, This change authorizes an excavator to use certain equipment prior to determining the exact location of the subsurface installations and would require the California Underground Facilities Safe Excavation Board, on or before July 1, 2020, to adopt regulations to implement this provision.

DELEWARE

SB 189 signed 8/29/2018– Provides mandatory reporting requirements for facility operators to report damage caused by excavation to facilities in excess of $3,000.00 to the Public Service Commission within 15 days. Also, all pipeline facility operators shall report damage caused by excavation to gas distribution and transmission lines, oil and petroleum products distribution and transmission lines, or dangerous materials, product lines or steam lines. Further, the Attorney General and the Public Service Commission shall review each notification of failure to perform an act required by the law or damage to facilities to determine any violations by the operators, excavators or the notification center. This new provision gives authority to the Attorney General or the Public Utilities Service Commission to impose penalties appropriate to the circumstances and gravity of violation.

**INDIANA**

SB125 Passed 03/15/2018 - Requires a utility excavation contractor doing work for a utility or communications service provider to register with the secretary of state a statement that the contractor and its employees will comply with Indiana’s 811 statute. The contractor must provide documentation of compliance prior to entering into a contract.

[https://indiana811.org/](https://indiana811.org/)

**KENTUCKY**

SB 104: Passed 04/02/2018 – Provides definition for “Commission” as the Kentucky Public Service Commission. Also, each operator shall report to the commission excavation damage to an underground facility used in the transportation of gas or hazardous liquid within thirty (30) calendar days of being informed of the damage. Further, grants authority to the Commission to promulgate administration regulations to enforce, assess civil penalties and to seek injunctive relief for any violation that results in damage to an underground facility used to transport gas or hazardous liquids that are subject to federal pipeline safety laws. Three notable inclusions include: (a) once the commission initiate investigation no other state, city, or fire protection agency shall initiate enforcement, (b) Penalties paid will be deposited into the State Treasury and credited to the commission account, and (c) Penalties shall conform with Federal penalties.

**OREGON**

Administrative Rule Change Approved 11/24/2018: Effective 01/01/2019 - The changes to this rule are extensive and include (a) clarifying definition of business day to mean any 24-hour day other than a Saturday, Sunday, or federal or state legal holiday as provided in ORS 757.542. A business day begins at 12:00 a.m. and ends at 11:59 p.m., (b) Adding a definition for “ticket life” to establish that a locate ticket is valid for 45 days, (c) definition of “Tolerance zone” to mean the area within 24 inches surrounding the outside dimensions of all sides of an underground facility, (d) Change excavation notice to at least two full business days, but not more than 10 full business days before beginning an excavation, the excavator must notify the Oregon Utility Notification Center of the date and location of the proposed excavation, and the type of work to be performed, (e) Provides limited exemptions for less than 2 business day notification obligation of excavator, (f) Refine “reasonable accuracy” definition to mark within 24 inches of the outside lateral dimensions of both sides of all its locatable underground facilities within the area of proposed excavation. All marks must indicate the name, initials or logo of the operator of the underground facilities, and the width of the facility if it is greater than 2 inches and provide marks to the excavator of the unlocatable underground facilities in the area of proposed excavation, using the best information available including as-constructed drawings or other facility records that are maintained by the facility operator, (g) large project design ticket requirements, (h) Mandatory safe excavation practices and excavation obligations when damaging an underground facility, and (i) Specific excavation requirements near critical facilities.

**OKLAHOMA**

SB 997 Passed 04/26/2018 - Amended definition of underground facility to include the following: *intrastate and interstate gas pipelines, as described in 49 CFR Part 192.1, intrastate and interstate hazardous liquid or carbon dioxide pipelines, as described in 49 CFR Part 195.1, water (including storm water), steam, sewage and other commodities.* Also, includes an effective date of 11/01/2018.

**NEW YORK**

NY S06756- Passed 11/05/2018. Effective May 4, 2019. Mandatory training for excavators performing work with government contracts. This training shall be conducted by the one-call notification center or any other provider authorized by the Public Service Commission. Further, any operator whom contracts or performs excavation of underground facilities shall require the excavator to complete this training in manner described above. Another addition requires excavators to contact the fire department in the event of an electrical short, escape of gas or hazardous fluids endangering life.

**PENNSYLVANIA**

SB 242 10/30/2017; Effective April 28, 2018 - To recap substantial changes effective in 2018 as follows: (a) additional definitions such as alleged violation and work site, (b) Some important revisions to the previous definitions are as follows: Facility owners and excavators are now able to designate an excavation project as complex, unconventional oil and gas well production and gathering lines or facilities are now defined under facility, (c) exemptions to excavation work now include excavation that relates to the protection of underground facilities, stripper lines, excavation in the operation of a well pad, mining and coal refuse disposal, (d) new lawful start date shall be three business days through ten business days following notification to the One Call System, (e) An excavator shall renotify the one call center if misrepresented or not marked facilities and wait three hours before proceeding with excavation subject to the limitations, (f) The process for submitting an alleged violation has changed to be submitted through the one call system within 30 days after receipt of notice that a facility has been damaged. Designers shall submit alleged violations through the one call system within 30 days of becoming aware of the alleged violation. Excavators will submit alleged violation through the one call system within 10 days of damage to a facility, (g) Facility owners will maintain records of abandoned facilities and mark the mains starting with the effective date of this provision, and (h) The
one call center is now delegated as the record keeper of alleged violation reports and all supporting documentation available for the commission and emergency management.

**SOUTH DAKOTA**

HB1159 Signed 03/05/2018 – Provides excavator obligations for damage to a facility as follows: “If any underground facility is damaged, dislocated, or disturbed in advance of or during excavation work, the excavator shall immediately report the one-call notification center and, if known, the operator of the facility that is causing the damage, dislocation or disturbance”. Also, If the damage, dislocation, or disturbance results in the escape of any flammable, toxic, or corrosive gas or liquid, the excavator shall immediately report the escape to the authorities by calling the 911 emergency telephone number and notifying the one-call notification center and, if known, the operator of the facility. Further, contractor shall not conceal or attempt to repair damage.

http://www.sdonecall.com/

**TENNESSEE**

HB 1791/SB1812 Passed 04/23/2018- Tennessee underwent several additions to their one call law as follows: (a) Established requirement for uniform color code and consistent marking best practices, (b) Adds a provision that an operator who is not a member of the one call will be held in violation; subjecting them to fines and penalties, (c) Allows the one call center to provide training for violators, (d) Allows the executive committee to review the reasonableness of fees for training mandated for violators, (e) Adds definition for contractor locator and adds a contractor locator representative to the enforcement committee, (f) Adds recovery protocols for non-payment of penalties and (g) Modifies exemption language for railroad, Tennessee department of transportation and any natural flowing run off systems.

http://www.tenn811.com/

**TEXAS**

Chapter 18.1, 18.4, 18.11 Administrative Rule Changes 2018 Effective 02/12/2018 The Railroad Commission of Texas damage prevention program updates requirements for excavators who strike a pipeline while digging to notify 811 as soon as possible, but no later than one hour after an accident. Also, excavators must also contact 911 if natural gas or product is released. The rule update extends the deadline for pipeline operators and excavators to file a damage report with the Railroad Commission from 10 days to 30 days.

https://www.rrc.state.tx.us/all-news/020818a/

**WISCONSIN**

HB532 Passed 01/31/2018 Creates procedures for handling complaints about violations of requirements under current law regarding excavations that involve natural gas or hazardous materials to include process time constraints. These complaints will be handled by the diggers hotline and assigned to a seven-member panel for investigation. The seven-member panel is made up of the following representatives: two transmission facility owners; two excavators; one employee of the one-call system’s operational center; one member representing a political subdivision; and one person employed as an underground line locator. The panel shall determine violation and decide to assess education or escalate to the Public Service Commission. The Public Service Commission may dismiss, assign penalty or enter into a consent agreement. The penalty structure shall be no more than $25,000 for each violation, with each day of violation constituting a separate violation. If the Public Service Commission assesses a forfeiture in an order or consent agreement, the respondent will be required to pay a surcharge to the one-call system that is equal to 10 percent of the forfeiture. Some other notable changes are: (a) Requires excavators to promptly report to the 911 emergency telephone number upon discovering that flammable, toxic, or corrosive gas or liquid that may endanger life, cause bodily harm, or result in damage to property (b) Imposes requirements for parallel-type excavations and for using power-operated excavating or earthmoving equipment on certain excavations, (c) Specifies that an owner has marked its transmission facilities in a reasonable manner as required under current law if the owner has located and marked the facilities to a level of accuracy and precision consistent with national standards, (d) Allows the one-call system to establish policies, procedures, and forms for complaints made to the panel and allows the Public Service Commission to promulgate rules regarding its duties under the law, and (e) Grants additional powers and duties previously assigned to the Department of Administration to the Public Service Commission; along with assigning additional powers and duties in changes to regulations of public utilities.
