Colorado Natural Gas, Inc. (CNG) is a local distribution company that has been providing natural gas services to both commercial and residential customers since May of 1997. CNG currently provides services in eleven counties and reaches several mountain communities.

CNG places the highest priority on public safety, health and environment. Operation and maintenance of CNG's distribution system is conducted by qualified staff committed to safely providing natural gas services. In the event of a natural gas emergency our field personnel are extensively trained and fully equipped to respond. Our response personnel coordinate any efforts with all local police and fire departments as well as any other emergency responders.
