El Paso

Southwest Generation is a rapidly growing privately held energy company based in Denver, Colorado, that is building a diversified portfolio of natural gas-fired power generation assets.

Southwest Generation employs a strategy of improving operational efficiency, reducing costs and increasing the overall value of power generation assets. Our clean, efficient gas-fired generation assets are flexible and responsive to the integration of wind and solar generation resources, providing reliable regulation for renewable technologies.

Southwest Generation has facilities located in California, Nevada, New Mexico and Colorado. The Fountain Valley facility located in El Paso County, Colorado owns and operates approximately 6 miles of natural gas transmission pipeline.

COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT

Public and environmental safety is the highest priority in the operation and maintenance of the SWG Fountain Valley pipeline. SWG employs a qualified staff of professionals that are committed to safely transporting natural gas. In the event of a pipeline emergency, our SWG Fountain Valley personnel are trained and fully prepared to respond. Our response personnel coordinate their efforts with local police and fire departments and other emergency responders.
