Plains All American Pipeline, L.P. operates a network of pipeline systems in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. Except for several small production locations, the pipeline systems are operated remotely, via satellite communications in Midland, TX. The control center has the ability to shut down pumping equipment as needed to prevent further damage by a possible leak or other emergency.

- ❖ All facilities are identified with signs stating the facility name.
- ❖ All pipeline locations are identified with signs at conspicuous locations along the right of way.
- ❖ Except for isolated instances, all pipelines are carbon steel and buried underground.
- ❖ Crude oil is present in the pipelines at any time.
- ❖ Pipeline pressures vary from 100 PSI to 1440 PSI.
- ❖ Crude oil is flammable and contains various flammable gas vapors.
- ❖ Crude oil is known to contain benzene at various levels. Benzene is a known carcinogenic.

COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT

The following procedures are recommended for any concern to the public or environment is suspected due to a possible pipeline or pipeline facility emergency involving, or possibly involving Plains All American Pipeline, L.P. (PAAP). Detection of a possible leak may be visible oil on the ground or in water or as little as stained ground or odor.

- ❖ Notify Plains All American Pipeline, L.P. control center immediately by calling 1-800-708-5071 (manned reception every day, 24 hours/day)
 Explain your findings
 Give the best location description possible
- ❖ Call the local emergency personnel if there is a danger to the public – 911
- ❖ Local PAAP office hours – 7:00am to 4:00pm, Monday through Friday.
- ❖ Extinguish all sources of ignition near the leak site – cigarettes, car engines, etc., and keep away from leaked oil.
- ❖ Do not attempt to close valves or operate any facility. Only Plains All American Pipeline personnel should do so to prevent possible other emergency situations.
- ❖ Emergency responders should attempt to contain the leak from further damage.
- ❖ The perimeter of the leak site should be guarded at a safe distance to prevent further danger to the public and access by unauthorized personnel.
- ❖ Any exposed pipeline due to erosion, accidental “dig in”, etc. should be reported to Plains All American Pipeline immediately.
