Wyoming Counties of Operation

Fremont Sweetwater

ExxonMobil owns and operates a Department of Transportation (DOT) regulated liquid CO₂ transportation pipeline in Wyoming. The CO₂ is produced by our Shute Creek Facility in Lincoln County, then compressed at our Sweetwater compressor station. CO₂ leaves the Shute Creek Meter Station through a 24-inch pipeline known as the Rock Springs Mainline, which continues along side Highway #372. At the Green River Junction, mile post 10, a 20-inch pipeline spurs off & heads east across Red Desert 113 miles to our Bairoil Meter Station known as the Bairoil Mainline. Customers along this line take CO₂ for enhanced oil recovery. The 24" Rock Springs Mainline continues from the junction 12 miles to Rock Springs Metering Station, which is between Rock Springs & Green River North of I-80. Along the way, customers take small quantities of CO₂ for purification. The CO₂ then leaves the Rock Springs Station and heads to Colorado for enhanced oil recovery.

ExxonMobil trains our operations personnel according to the DOT Operator Qualification requirements. We also conduct periodic pipeline emergency response drills. In addition, only those contractors that have the applicable DOT Operator Qualifications are allowed to perform work on our pipeline.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

Safety is a fundamental value of ExxonMobil. We believe that no business objective is so important that it will be pursued at the sacrifice of safety. Our goal is to steward injuries, illnesses, operational incidents, and releases as close to zero as possible. Each of us has an individual responsibility to make the safety of ourselves, our co-workers, and those around us a foremost consideration in everything we do.

It is Exxon Mobil Corporation's Policy to conduct its business in a manner that protects the safety and health of employees, others involved in its operations, our customers and the public and the environment. The Corporation strives to prevent accidents, injuries, and occupational illnesses through the active participation of every employee. The Corporation is committed to continuous efforts to identify and eliminate or manage safety risks associated with its activities.
