Products Transported:
Natural Gas

24-HOUR EMERGENCY CONTACT:

1-800-272-4817

Operating Counties in UT:

Davis Salt Lake

Morgan Summit

Residential, commercial and industrial users depend on Kern River to safely and reliably deliver natural gas through a 1,680-mile interstate pipeline stretching from southwestern Wyoming to Southern California. Kern River offers a balanced approach to meeting the West's growing demand for clean-burning natural gas while supporting the protection and preservation of natural resources. Kern River is committed to protecting the environment and operating energy facilities in a safe and reliable manner.

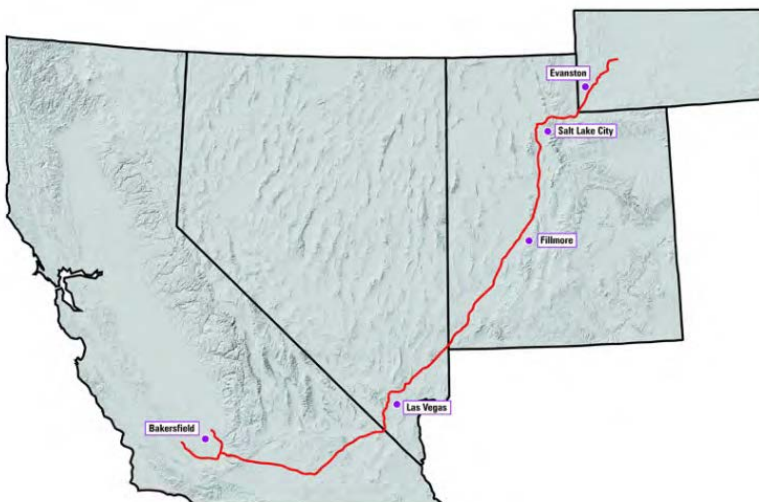

COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT

Kern River is committed to safety and believes it is an integral part of our company's performance. Kern River's policy is to meet or exceed all applicable local state and federal safety laws and regulations in the construction and operation of our pipelines and facilities.

To ensure the safety of our system and the people around it, we monitor our pipeline operations 24 hours a day, 365 days a year. We have an integrity management program in place to evaluate the condition of our pipeline, and regularly patrol our right of way and maintain a clear right of way to allow for the easy identification of construction-related activities near our pipeline.

We also have a comprehensive security plan to address possible threats to our facilities.

Pipelines are the most efficient and environmentally sensitive method of transporting energy. In all of our operations, we do our best to minimize the impact to the environment and surrounding communities.
