ABOUT VANTAGE PIPELINE US LP

Vantage Pipeline US LP (Vantage) is the operator of the Vantage Pipeline and the West Spur Lateral (known as Vantage U.S.). Vantage is a subsidiary of Pembina Pipeline Corporation.

Vantage U.S. is comprised of approximately 128 miles of pipeline, originating from gas plants in Tioga and Stateline, North Dakota and extending to the northwest corner of North Dakota, running through Williams County and Divide County. Vantage U.S. links the North Dakota Bakken Formation – an underground area that has large deposits of oil and natural gas – to the petrochemical industry.

The pipelines are high vapor pressure (HVP) pipes that transport ethane to the Canadian border, and from there the product is sent to the petrochemical industry for processing in Alberta, Canada.

Vantage U.S. is buried underground. Line markers and warning signs are used to indicate the presence of the pipeline in areas along the Right of Way. Here is an example of the marker used to identify the Vantage U.S. pipeline.

VANTAGE IS FOCUSED ON PIPELINE SAFETY AND MAINTAINING THE INTEGRITY OF OUR PIPELINES

We know that maintaining the integrity of our oil and gas pipelines is essential to the health and safety of the communities where we operate. That’s why we’ve developed, and are continuously improving, processes and programs to monitor our pipelines.

Vantage ensures our pipelines and facilities are designed, constructed, and operated in a safe and environmentally responsible manner. We develop stringent standards and review potential hazards, in addition to conducting regular safety meetings, contractor screenings, and inspections.

Vantage conducts regular inspections, maintenance, and testing to confirm that pipelines are operating safely. Pipelines are monitored 24/7/365 from a control room using sensors that monitor flow

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

and operating conditions. We also use in-line tools and aerial inspections to monitor pipelines.

SAFETY IS A SHARED RESPONSIBILITY

Pipelines are designed and constructed to be safe. Vantage takes many steps to ensure safe and reliable operations which include a strict adherence to a solid Integrity Management Program and continuous monitoring and maintenance. Damage from third-party excavation and construction activities around pipelines is the most common cause of damage to pipelines. That’s why safety is a shared responsibility and members of the digging community and the public have a responsibility to help protect pipelines from damage.
