324 South State, St. Salt Lake City, UT 84111

**Pipeline Operations:** We are an evolving energy company, proud to steward a family of enduring brands that provide essential fuel and specialty products for modern and future life. Our operations include a 94-mile, 16-inch crude oil pipeline running from Evanston, WY to Salt Lake City, UT, operating at 980 psi. We also manage the UNEV Pipeline system, a 427-mile, 12-inch refined products pipeline originating in Salt Lake City, UT, that delivers fuel to key markets in Cedar City, UT, Las Vegas, NV, and beyond, operating at 1,480 psi. Our 6" Woods Cross Hydrogen line is 4.48 miles in length and has an MOP 1,982 psi. Additionally, HF Sinclair Midstream operates various pipelines connecting critical refineries in North Salt Lake, UT, ensuring seamless and reliable energy transportation.

**Commitment to Environmental, Health, and Safety:** We are committed to developing a culture that goes beyond regulatory requirements, ensuring the highest standards of environmental, health, and safety practices that reflect HFSM's core values. We pledge to care for the environment, our employees, and the public, while fostering continuous learning through comprehensive training and development programs. Safe work practices will be integrated into all activities, and we will maintain a state of readiness to effectively respond to emergencies. We are dedicated to managing organizational change with integrity and teamwork, ensuring improved planning, ownership, execution, and communication with all stakeholders.

**811 CALL BEFORE YOU DIG:** HFSM is a member of each State's One-Call system where we operate. This is a free service to inform underground utilities and pipeline owners of any planned excavation activities that could potentially affect our pipelines. We ensure the management of all One-Calls is done according to State requirements and encourage the use of 8-1-1 to all excavators to promote safe digging practices.
