

ABOUT BELLE FOURCHE PIPELINE COMPANY

Belle Fourche Pipeline is a liquids pipeline operator that gathers and transports crude oil in the Williston basin of Western North Dakota and the Powder River basin of Wyoming. Belle Fourche also operates a products diesel pipeline in Wyoming. Belle Fourche Pipeline is part of a system of pipelines operating over 3,400 miles of pipeline.

WHAT DOES BELLE FOURCHE PIPELINE COMPANY DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Belle Fourche Pipeline Company invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. Belle Fourche Pipeline Company also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Motor operated control valves are utilized to isolate a leak.
