

## Pipelines Nearby

### **Purpose and Scope:**

The purpose of the program is to provide approximate pipeline location information along with general hazard recognition and response information for member pipelines near a specific location. The program will allow stakeholders, who include: municipalities, businesses, schools, residents, 911 centers, and emergency officials to enter location information into a web based application, or use a mobile device, and receive information for the five member pipelines closest to a specific location. The application can be accessed at: [www.pipelinesnearby.org](http://www.pipelinesnearby.org)

### **Program Elements**

A web application also having the capability to interface with various mobile devices such as smart phones and tablets will be freely available to all stakeholders.

Location information may be entered into the web application by typing in a street address or clicking a point on a map. GPS enabled mobile devices will deliver location coordinates through the mobile-friendly application. When information for a specific location is received in the database, it will render the following information:

- Product transported
- Approximate distance and direction to the pipeline
- Name of the pipeline operator
- Emergency phone number
- Non-emergency phone number
- Common indications of a pipeline leak (see chart on last page)
- Potential hazards associated with a release (see chart on last page)
- Recommended general emergency response actions (see chart on last page)

### **Sign up**

Members must submit pipeline location information in an electronic format suitable for import into common GIS applications. The information for each pipeline must include the product transported, identified with one of the following categories:

- Odorized Natural Gas
- Un-odorized Natural Gas
- Odorized Petroleum Gas
- Un-odorized Petroleum Gas (includes liquefied propane, ethane, butane, etc.)
- Petroleum Liquids (includes sweet crude oil)
- Anhydrous Ammonia
- Carbon Dioxide
- Ethanol
- Hydrogen Gas
- Sour Gas (H<sub>2</sub>S)
- Sour Crude Oil (H<sub>2</sub>S)
- Liquids & Odorized Nat Gas

## **Pipelines Nearby**

Members desiring to participate in the program should send the information they would like included in the program to: [admin@pipelineawareness.info](mailto:admin@pipelineawareness.info). GIS information may be submitted anytime during the year. The centerline information will be imported into a secure database and only used for the purposes of the program. Member information will not be shared with outside parties and will be handled in accordance with the *Confidential Member Information Policy* posted on the Association's web site.

Members are responsible for submitting updated or revised information as appropriate.

### **Dues**

Dues for participation in this program are included in the annual dues for basic membership.

### **Leak, Hazard, and Emergency Response Information**
