NuStar Logistics L.P.'s (NuStar) Central West Region is a subsidiary of NuStar Energy L.P., which is a publicly traded, limited partnership based in San Antonio, with 8,417 miles of pipeline; 90 terminal and storage facilities that store and distribute crude oil, refined products and specialty liquids; and two asphalt refineries and a fuels refinery with a combined throughput capacity of 118,500 barrels per day. The partnership's combined system has over 94 million barrels of storage capacity. One of the largest asphalt refiners and marketers in the U.S. and the second largest independent liquids terminal operator in the nation, NuStar has operations in the United States, Canada, Mexico, the Netherlands, including St. Eustatius in the Caribbean, the United Kingdom and Turkey. For more information, visit NuStar Energy L.P.'s Web site at [www.nustarenergy.com](http://www.nustarenergy.com).

**COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT**

Protection of our employees, contract employees, customers, general public, and environment is our highest priority and a core business value. NuStar is committed to achieving health, safety and environmental excellence throughout the corporation. It is every employee's responsibility to conduct business in accordance with this commitment, and management's responsibility to provide the resources, equipment, training, and tools to ensure continued improvement.

We will adhere to these high standards by:

1. Designing, constructing, and operating our facilities in a manner consistent with protecting human health and the environment.
2. Implementing procedures, management systems, and training programs to prevent occupational illnesses, injuries, accidents, and environmental impairment.
3. Meeting or exceeding applicable governmental standards.
4. Preparing and equipping our facilities to respond to emergency situations.
5. Maintaining clean facilities to ensure the highest health, safety, and environmental standards.
6. Managing our raw materials and products in a safe and environmentally sound manner.
7. Reducing waste generation and emissions and conserving natural resources.
8. Maintaining good working relationships with appropriate legislative and regulatory bodies to provide input for the development of cost effective scientifically based laws and regulations.
9. Communicating openly with our employees, contract employees, customers, public entities, and our communities to promote understanding of our health, safety, and environmental commitment.
10. Conducting evaluations and reporting findings to executive management to ensure continuous improvement.
