

ABOUT BRIDGER PIPELINE LLC

Bridger Pipeline LLC operates the Belle Fourche Pipeline system in ND, MT, and WY the Butte Pipeline system in MT and WY, and the Fairview Pipeline system (Formerly Bayou Midstream Bakken LLC) in ND and MT. The combined systems gather and transport crude oil from the Williston basin of Western North Dakota, Eastern Montana, and the Powder River basin in Wyoming with further transportation and interconnections to several market centers around the country. Bridger Pipeline also operates a product diesel pipeline in Wyoming. Altogether Bridger Pipeline operates over 3,400 miles of pipeline ranging in pipe diameter from 4” up to 20”.

WHAT DOES BRIDGER PIPELINE LLC DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Bridger Pipeline LLC invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. Bridger Pipeline LLC also utilizes aerial surveillance and/or on-ground observers to identify potential dangers.

**EMERGENCY CONTACT:
1-866-305-3741**

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:		
Crude Oil	1267	128

**NORTH DAKOTA
COUNTIES OF OPERATION:**

Billings	McKenzie
Bowman	McLean
Dunn	Mountrail
Golden Valley	Stark

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Motor operated control valves are utilized to isolate a leak.

PRODUCTS TRANSPORTED IN YOUR AREA

Product: Crude Oil

Leak Type: Liquid

Vapors: Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.

Health Hazards: Inhalation or contact with material may irritate or burn skin and eyes. Fire may produce irritating, corrosive and/or toxic gases. Vapors may cause dizziness or suffocation. Runoff from fire control or dilution water may cause pollution.
