

Hildale/Colorado City Gas Department has been serving Hildale Utah and Colorado City Arizona with natural gas. The Hildale/Colorado City Gas system was established in 2002 and began serving Colorado City Arizona in 2023.

The department takes delivery of natural gas from Enbridge at their Gate Station on 600 North in Hurricane Utah. Natural gas is then transported through a high-pressure distribution line following SR 59 to Hildale and is distributed through a low pressure line to the communities.

In the event of a suspected gas emergency:

- Call 911
- Contact the line Operator 435-467-1160
- Isolate area and restrict entry to
 - Trained emergency personnel
 - Designated pipeline company employees
- Avoid explosion hazards
 - Potential ignition sources include electrical motors, firearms, vehicles, telephones, static electricity, open flames or sparks
 - Avoid forced ventilation of structures and excavations. Forced ventilation can actually increase the possibility of a flammable atmosphere.
- If the gas is on fire, let the escaping gas burn
- Do not operate the valves yourself. Only pipeline company employees operate valves to isolate the emergency.
