After hours, weekends, holidays

The Nephi City Gas system is owned and operated by Nephi City. The system was established in 1991. Nephi City Gas Department supplies natural gas to the residents within the incorporated areas of Nephi City, as well as residents in the unincorporated areas of eastern Juab County.

Nephi City takes delivery of its gas from Mountain West Pipeline at Currant Creek, located west of mona, and Payson Gate Station located up Payson Canyon. The gas is then transported on a main line operated by Nephi City. This main line passes thru the communities of Payson, Spring Lake, Santaquin, Mona, Nephi, and terminating at Levan. The Main line also provides gas to Mona City, Rocky Ridge town, and Levan Town.

The Nephi City Gas Department currently serves 2800 meters and provides approximately 500,000 Decatherms of natural gas to its customers annually.
